MISSION

MISSION STATEMENT

PROTECT

The mission of the Metropolitan Police Department is to protect, serve and assist citizens when conditions arise that may affect the well being of the individual or the community.

SERVE

Cooperating with others in the community, police will work to prevent and detect crime,

ASSIST

protect life and property, and achieve a peaceful society, free from the fear of crime and disorder. Members of the Department will strive continually for excellence and maintain the peace through service, integrity, leadership and fair treatment to all.

B+S

BOARD OF COMMISSIONERS

LETTER FROM THE PRESIDENT OF THE BOARD OF POLICE COMMISSIONERS

PROTECT

The Metropolitan Police Department is one of the top law enforcement agencies in the country.

SERVE

That is no overstatement. The information and statistics in the 2004-05 Annual Report validate the strength, determination and pure hard work of the Department's officers and civilian employees.

ASSIST

Every second of every day, men and women of this Department demonstrate their commitment to the City of St. Louis by risking their lives to protect and serve citizens.

COLONEL BART SARACINO

On January 30, 2004, the Department witnessed this commitment firsthand. Police Officer Nicholas Kevin Sloan, a 24-year-old father, made the ultimate sacrifice to the community when he was killed in the line of duty. His loss is mourned by all of St. Louis.

On October 14, 2004, another brave young officer nearly lost his life. While conducting a routine arrest, Officer Matthew Browning was injured by a drunken driver, losing both of his legs, but his spirits remain high and his rehabilitation efforts are succeeding.

Both Officer Sloan and Officer Browning displayed determination and will. Their acts serve as a great source of pride to everyone in the Department. They also are proof of the pledge to make the community safe.

The Department's commitment also is evident in the crime statistics released for 2004-05. The numbers document a 12.6 percent decrease in overall crime in the City of St. Louis compared to 2003. Perhaps one of the most dramatic decreases was the 34 percent reduction in vehicle thefts over a two year period. This is a credit to the Department's Anti-Crime Task Force, which works diligently with the Circuit Attorney's Office and the Juvenile Court to prevent and deter auto thefts.

Likewise, the Department's investment in technology signals its commitment to the community.

The new forensic laboratory distinguishes the Department nationally, with its state-of-the-art technology encompassing 40,000 square feet of space and three floors at the Department's downtown headquarters.

The forensic laboratory officially opened in early 2005 and includes Biology, Serology, DNA, Arson, Trace and Drug Chemistry labs. Being at the forefront of forensic investigations has allowed the Department to solve high-profile criminal cases such as the Southside Rapist and serial murderer Maury Travis, and it positions this agency as one of the country's leaders in modern criminal investigations.

Updating officers' tools also is an essential aspect of crime fighting. In 2004, the Department took the necessary step of issuing officers new high-powered rifles, as criminal weapons have become more sophisticated and dangerous. As a member of the Board of Police Commissioners, I support investing in our officers.

St. Louis Mayor Francis G. Slay and St. Louis Police Chief Joseph J. Mokwa have made my job easier. Their commitment to the Department—and, as a result, the City of St. Louis—is commendable.

It is a privilege to present the 2004-05 Annual Report to the Community. I hope it confirms your confidence in the Metropolitan Police Department—past, present and future. I hope you realize, as I do, that the Department is one of the finest in the country.

Sincerely,

Colonel Bart Saracino
President, Board of Police Commissioners

“The new forensic laboratory distinguishes the Department nationally, with its state-of-the-art technology encompassing 40,000 square feet of space and three floors at the Department's downtown headquarters.”

MESSAGE FROM THE CHIEF OF POLICE

Joseph Mokwa

CHIEF OF POLICE

PROTECT

SERVE

ASSIST

CHIEF JOSEPH MOKWA

Each day, the men and women of the Metropolitan Police Department are committed to making the streets of St. Louis safer. With 79 wonderful and distinct neighborhoods, the City of St. Louis offers something for everyone. The more than 1300 officers of the Department are dedicated to protecting the community they serve and striving to build relationships with residents like you.

You, the community are our most valued ally. You are the eyes, the ears and the pillars of our neighborhoods. Your refusal to tolerate crime and your willingness to help bring justice to your neighbors is having a positive impact in our community.

Last year, I met with thousands of individuals throughout the City. They shared their thoughts on how we could help them. What I learned is that while violent crime is always a major concern, nuisance crimes affect a greater number of people. Quality of life is your overwhelming concern. To that end, I want you to know that the Department is committed to curtailing those nuisance crimes.

Police work is a very complex career. A simple example of this is when we are called to disperse a group of young men and women. Residents complain that people are congregating, but when we intervene, the group complains that we are harassing them. We not only have to know the law, we have to understand each situation and deal with it appropriately.

Residents have also expressed concern regarding vehicle break-ins and vehicle theft. It is a problem that you hear about year after year. By working with the community and making this a priority, I am pleased to report that vehicle thefts were down 34 percent during the last two years. This drop is a direct result of solid police work and the cooperation of our community members.

The Department serves a diverse, growing population in the City. We work daily to stabilize neighborhoods and to meet the expectations you have regarding your quality of life.

Citizens also tell us that our hard work and efforts are paying off and we continue to make our City a great place to live and visit. Residents have expressed their appreciation for our presence in their neighborhoods and value the relationships they have built with us.

Keeping the lines of communication open between the community and members of the Police Department fosters cooperation and trust. I encourage all citizens to get involved and become an active part of helping to improve the safety of your streets.

We look forward to continuing to build strong relationships with the community and to collaborate with you to address the concerns that are important to us all. When we all work together, we are a powerful force in keeping St. Louis safe.

Sincerely,

Joseph Mokwa

Chief Joseph Mokwa
Chief of Police

“The Department serves a very diverse, growing population in the City. We work daily to stabilize all neighborhoods and to meet the expectations you have regarding the quality of life you expect.”

FORENSIC LABORATORY

The Metropolitan Police Department boasts a powerful weapon in its crime-fighting arsenal. The new Forensic Laboratory is a state-of-the-art facility built in 2005 and highly-regarded by criminologists nationwide.

The laboratory embodies more than 40,000 square feet on three floors and accommodates 70 employees trained in the latest forensic techniques and methodologies. Cutting-edge technology strengthens the Department's capabilities for testing DNA, blood, drug traces, firearms and other evidence from crime scenes.

"The Forensic Laboratory is top-of-the-line, spacious and, overall, impressive," St. Louis Police Chief Joseph Mokwa said. "But more important than the wow factor is the laboratory's ability to assist police in catching criminals and, ultimately, bringing justice to victims' families."

The \$8.5 million facility more than triples the size of the old lab, which had been housed on the third floor of Police Headquarters. Built in 1934, the old lab was cramped and devoid of special systems like humidity controls and ventilation needed for laboratory work.

The new laboratory not only has top-notch equipment, but it provides insurance that the Department's crime-fighting resources will grow with technology. Designed and built by Burns & McDonnell, ERM Technologies, Inc., Health Education + Research Associates (HERA), Inc., and K & S Associates, the Forensic Laboratory offers the fiber-optic wiring and overall ability to support crime-solving technologies not yet developed or discovered. Space was also added to allow for a larger staff and added technologies, such as robotics.

"We are prepared for the future," said Harold R. Messler, Manager of Criminalistics for the Department. "It is an exciting time for us. We are gratified that the St. Louis Board of Police Commissioners and the community at large realize the importance of having a state-of-the-art Forensic Laboratory."

In 1998, St. Louis voters approved a \$10 million bond issue to finance the laboratory. Former United States Congressman Richard Gephardt secured an additional \$390,000 grant from the federal Department of Justice for laboratory equipment and instruments.

FINGERPRINT ANALYSIS

FORENSIC LABORATORY (CONT'D)

By all accounts, the expense was worth it. The laboratory is an important civic investment in modern forensics—a fast-paced, highly-evolving science that law enforcement officials are relying on more and more, particularly in solving cold and high-profile criminal cases like the Southside Rapist and Maury Travis.

"The laboratory is an investment in the future of the City of St. Louis," said Bart Saracino, President of the St. Louis Board of Police Commissioners. "It is an effective tool for making St. Louis safe, now and in years to come."

On the first floor, the Forensic Laboratory houses a secure garage where vans from the Department's Evidence Technician Unit (ETU) transport and deliver evidence via an impregnable system that helps to prevent compromising evidence.

The first level also comprises the building's mechanical systems and two vehicle processing bays in which the Department's experts in fingerprinting, DNA, and other forensic methods can conduct on-the-spot tests and analyses on crime-scene vehicles. The bays are enclosed and equipped with state-of-the-art technology, including snorkeling vents that take fumes out of the space.

Main laboratory spaces, including Biology, Serology, DNA, Trace and Drug Chemistry, call the second floor home. Besides boasting the best and latest technology, the labs were designed to minimize environmental contamination errors. For instance, in the DNA/Biosciences Unit, where forensic scientists analyze body fluids and tissues to identify violent criminals, air flow and pressure are regulated to stop particles like dust or skin from inadvertently tainting evidence.

Superb technologies will aide scientists as they resurrect unsolved cases from years ago. "We have a backlog of DNA cases," said Lt. Michael Shepard, Commander of the Forensic Lab. "The lab will help us to identify suspects in old cases. We have ambitious goals for the next several years."

FORENSIC LABORATORY

FORENSIC LABORATORY (CONT'D)

The floor's Chemistry Unit was designed so scientists can identify controlled substances within minutes. Each work station has its own data terminal, fume hood, sink and testing equipment such as an infrared spectrophotometry. The Department analyzes drugs within 20 hours of an arrest—a point of pride considering that in departments nationwide, the average turnaround for drug testing is 14 to 30 days.

The third floor consists of the ETU, Photo Lab, CAD/Graphics Area and Firearms. ETU workers collect evidence using a meticulous system that guards against contamination.

Small items, for example, are delivered through small slots in the bulletproof glass window in the Evidence Receiving Area, which has a secure elevator, bar coding and other high-tech processing tools.

Items larger in size pass through an evidence bay with doors locked on both sides. The evidence is then placed in a secure storage room or climate-controlled vault.

The Firearms Unit is another laboratory feature. Used an average of 25 times a day, it has a 40-foot indoor shooting range for the testing of firearms and weapons, a water tank and a ventilation system designed to remove smoke from the space. Walls, ceilings and floors can withstand shots fired.

The Department's Forensic Laboratory, one of a handful in the state of Missouri accredited by the American Society of Crime Lab Directors, was profiled recently in Forensic Magazine as "a textbook case of a lab that is safe, secure and prepared for 'what comes next' in solving crime."

"The new laboratory is a great benefit for the Department," Mokwa said. "And it is an even greater benefit for St. Louis citizens."

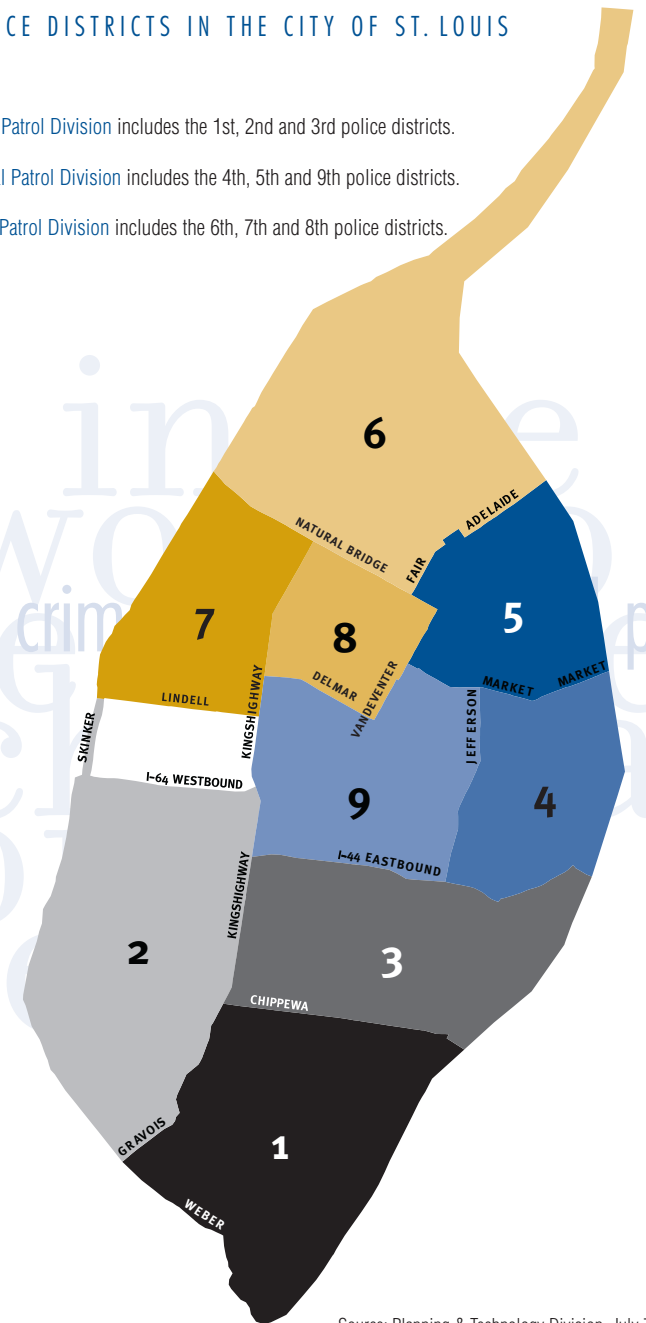

Cooperating with others in the community, police will work to prevent and detect crime, protect property, and achieve a peaceful society, free from the fear of crime and disorder.

POLICE DISTRICTS IN THE CITY OF ST. LOUIS

- South Patrol Division includes the 1st, 2nd and 3rd police districts.
- Central Patrol Division includes the 4th, 5th and 9th police districts.
- North Patrol Division includes the 6th, 7th and 8th police districts.

AREA PATROL DIVISIONS

SOUTH PATROL DIVISION MAJOR LARRY O'TOOLE

PROTECT

The South Patrol Division is proud to have launched several successful initiatives from 2004-05 that have helped to reduce total crime in our districts by 14.4 percent, compared to 2003.

SERVE

One initiative—the South Patrol Community Improvement Area—involved meeting with St. Louis City Aldermen to identify areas in the community that are ripe with crime and analyze trends in criminal behavior. The information allowed us to institute successful, cost-effective methods to deter criminals.

ASSIST

For example, in some troubled neighborhoods we installed barricades on one end of the street to control unlawful activity by making it difficult for criminals to get away. Another strategy included cutting back trees on high-crime streets. Without a lot of brush, criminals have a harder time hiding and residents having an easier time seeing the suspects and, therefore, providing police with accurate descriptions. We also have urged residents and business owners—our eyes and our ears—to call police when incidents arise.

A second initiative launched was the Metro Crime Exchange. This involved law enforcement officials from the Metropolitan Police Department meeting monthly with nearly a dozen representatives from police departments in surrounding municipalities in St. Louis County to discuss crime trends and share information about suspects. Since criminals ignore city boundaries, we often find that our trends matched. For example, when we experienced a rash of auto thefts, more times than not, the other municipalities did too. By working together, we have apprehended criminals and reduced crime throughout the City of St. Louis and the metropolitan region.

Specifically, these two initiatives and the dedicated and skillful men and women in our division have contributed to decreases in crime between 2003 and 2004. We recorded drops in the following areas: Auto thefts, 31.2%; aggravated assaults, 18.2%; total burglaries, 12.4%; robberies, 7%; larcenies, 7%.

We look forward to carrying out these initiatives during the coming years.

CENTRAL PATROL DIVISION MAJOR HARRY HEGGER

NORTH PATROL DIVISION MAJOR REGGIE HARRIS

PROTECT

SERVE

ASSIST

AREA PATROL DIVISIONS

The Central Patrol Division experienced one of its busiest years in 2004-05. Our Division includes the downtown area, which was the site of high-profile events that attracted hundreds of thousands of people. We had political events related to the U.S. presidential election in November 2004, the World Series, major celebrations to commemorate the centennial of the 1904 World's Fair and the bicentennial of the Louisiana Purchase, the annual Fair St. Louis and six weeks of waterfront activities during River Splash.

We are proud to report that there were no major incidents related to these events. We attribute this to the meticulous training and strategic planning by our division, as well as the hundreds of police officers throughout the Department who staffed the activities. It is my hope that the public views these security successes as an affirmation that we are prepared should a catastrophe occur. This is especially important for the community in light of continued threats to national security following the Sept. 11 terrorist attacks.

Also, the Central Patrol Division is pleased, in 2004-05, to have participated in the Downtown Partnership, a consortium of individuals and groups interested in downtown development. There is a tremendous amount of downtown growth as investors convert old office buildings into urban lofts. The mix of residents and businesses creates special policing needs. For example, we have increased foot and bike patrols in the area, allowing for flexible policing while also increasing our visibility.

We're instituting similar tactics in our Division's other high-growth, high-development areas, including the Central West End. We will continue addressing these needs in the coming years.

The North Patrol Division had prosperous years in 2004-05. We can measure the success in many ways, from new houses being built to new business developments to a renewed and positive interest by residents in their neighborhoods.

Much of the success can be attributed to our own North Patrol initiatives. These included partnerships with business owners and developers to secure and to increase the safety of the neighborhoods they're investing in. Uniformed officers worked closely with business owners, developers and residents, listening to their needs and tackling challenges. We've done a good job because a lot of people want to develop on the Northside.

Another one of our initiatives focused on frequent, strategic meetings between neighborhood organizations and our Neighborhood Stabilization Officers. These allowed us to identify and eliminate problems that could cause crime, such as neglected and derelict properties. After receiving community input, we met with the absentee landlords and told them what they needed to do to fix their properties. Most were happy to comply. For those who did not cooperate, we employed all the legal avenues available to us so that we could address the problem. Everyone worked together to improve the city.

Every day, we see the successes that these initiatives have had. For me, it's the small things, like driving through once dangerous areas and seeing senior citizens sitting on their porches, waving at us and smiling; or seeing children playing outside of their houses.

That's what it is all about.

EXPLANATION OF COMPLAINT DISPOSITIONS:

- Sustained:** Investigation disclosed sufficient evidence to support the allegation of the complaint.
- Not Sustained:** Insufficient evidence available to either prove or disprove the allegation.
- Unfounded:** The complaint was not based on facts, as shown by the investigation, or the incident complained of did not occur.
- Exonerated:** The actions complained of did occur, but the investigation disclosed that the actions were reasonable.
- Withdrawn:** Complainant withdrew complaint and the investigation was terminated.
